COMPANY OVERVIEW

At AVTech, our people go above and beyond to understand your needs and enhance your ICT ecosystem. We connect you with cutting-edge tech and design bespoke solutions – to fuel your long-term growth. Our commitment to maximising client value has fuelled our expansion across Australia and Asia. Our start-up spirit continues to spark fresh solutions and our focus on service excellence is as strong as ever.

We'll help you leave legacy systems behind, sharpen your competitive edge and propel your business into the future. Our skilled consultants leverage decades of expertise to optimise your operations and harness greater efficiencies. We'll surface actionable insights, shape your strategy and generate long-term value.

While ProCare – our class-leading managed services suite – is ready to slash costs and enhance asset availability. We'll empower your people, enable friction-free collaboration and safeguard your systems against costly threats.

Deliver and delight

Exceeding expectations is what we do. So we keep an open mind and look for ways to provide customer service excellence.

Dependable partners

We foster strong, long-term relationships. Working with clients as a team empowers us to transform firms large and small.

Trusted experts

Our people are highly capable and committed to helping clients navigate challenges – and seize opportunities.

Nimble by nature

To us, agile is more than a methodology. It's central to the way we think, collaborate and deliver responsive results.

Deeply curious

Our eagerness to explore propels us forward. We're always questioning what could be – and what could be better?

Adapt and evolve

Change is a constant in all industries. To help clients keep their edge, we embrace disruption – to design future-focused solutions.

KEY COMPETENCIES

Cloud

Assessment
Spark innovation and leave legacy systems behind. To prepare for a seamless cloud transition, we'll map your needs and evaluate your cloud transition strategy.

Transition
Our proven cloud transition methodology integrates people, processes and technology. It's how we deliver your high-impact, low-friction cloud-first future.

Assessment
Streamline your cloud processes, free up resources and cut costs. We support your cloud environment through monitoring, support, remediation, advisory and more.

Cyber Security

Detection & Response
Our cyber experts deliver state-of-the-art endpoint detection and response. To swiftly resolve malicious activity – before it compromises your network.

Identity & Access Management
With remote working and cloud computing, users can access assets anytime, anywhere. We establish appropriate access levels – to safeguard your data and systems.

Human Resources

Consulting & Advisory
Unlock greater efficiency gains and harness innovative solutions. Our skilled consultants will revitalise your business and generate long-term value.

Staff Augmentation
Finding top talent can be costly and time-consuming. We provide proven technical and non-technical resources to ease your recruitment pressures.

Managed Services

ProCare Managed Backup & Disaster Recovery
How protected are you when devices fail and tech threats strike? We'll replicate your IT systems to the cloud. So you can continue operating at full capacity.

ProCare Managed Network
Our skilled technicians leverage advanced software, improve security and streamline your processes. To improve connectivity and enhance efficiencies.

ProCare Managed Security
Our specialists will safeguard your systems to provide total data protection. We'll bolster your defences – while maintaining operational efficiency.

ProCare Service Desk
To keep your processes running smoothly, our service desk slashes solution times and mitigates risks. You'll receive prompt IT support and proactive solutions.

Modern Workplace

ProCare
Our ProCare managed services will save you time, slash costs and enhance asset availability. To propel your business into the future.

Collaboration
We empower your people to work seamlessly and securely from anywhere. We'll help revitalise your communications to enable reliable, high-value collaboration.

Networking
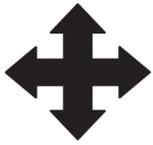

Managed LAN
Our certified network engineers will lower your LAN maintenance costs, reduce security threats – and keep your network running smoothly.

Managed WAN
Let our expert engineers manage your WAN, enhance your systems and optimise your operations. So you can go online, share data and collaborate – reliably.

Unified Communications
We'll unite your communication channels into a single platform. To help your people power productivity at any time, from any device.

Procurement
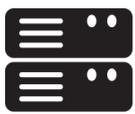

Hardware Procurement
We'll design a sustainable hardware solution that sparks innovation and powers productivity. Get ahead with unmatched reliability and performance.

Software Subscription
We'll design a tailored software solution that supports your systems, empowers your people – and lowers your total cost of ownership.

Finance & Leasing
Boost your purchasing power and access new tech sooner – to drive innovation. Sharpen your competitive edge and get ahead with our payment solutions.
